

Zvi Naiman

Senior Full Stack Developer / Technical Lead | .NET | Angular | Enterprise Web Systems

☎ 050-960-5770

✉ zvi.naiman@gmail.com

Professional Summary

Senior Full Stack Developer with over 15 years of experience in developing and leading complex enterprise information systems, cross-organizational infrastructures, and integration solutions within large-scale organizations.

Experienced in technical leadership of development teams, mentoring developers, writing technical specifications, and collaborating with business stakeholders, infrastructure teams, information security teams, and outsourcing vendors.

Specialized in Web and Backend development using C#, .NET Framework, and .NET Core / .NET 6–8+, alongside Frontend development with Angular.

Extensive experience in distributed systems, Microservices, Web APIs, Messaging infrastructures, and asynchronous processes (RabbitMQ, Azure Service Bus), including troubleshooting, performance optimization, and maintenance of mission-critical multi-user systems.

Professional Experience

June 2023 – Present | Freelance – Senior Full Stack Developer

Main client: Raffi Weinberger Law Office – development of a real estate process and documentation management system.

- Working directly with clients to analyze requirements and design system solutions
- Writing technical specifications according to client requirements and leading end-to-end development processes
- Managing a team of 5 developers
- Developing Web systems based on Microservices architecture
- Developing services using ASP.NET Core Web API (.NET 8)
- Integrating Word document processing using Novacode (DocX)
- Implementing Authentication & Authorization mechanisms (JWT, ASP.NET Identity)
- Developing user and permissions management modules
- Working with Message Bus technologies (Azure Service Bus, RabbitMQ)
- Frontend development using Angular versions 16–20, Tailwind, and Angular Material
- Working with HTML5, CSS3, TypeScript, and JavaScript

- Working with Entity Framework (Code First, Migrations)
 - Working with SQL Server and MySQL
-

December 2022 – May 2023 | Malam Team – Full Stack Developer

- Development and maintenance of a large enterprise information system
 - Working with .NET Framework and .NET Core
 - Developing ASP.NET Web API and ASP.NET MVC applications
 - Maintenance and modernization of legacy systems
 - Frontend development using Angular v16 and PrimeNG
 - Working with JavaScript, HTML5, CSS3
 - Working with SQL Server and T-SQL
-

June 2022 – December 2022 | Rotem Dynamics – Integration Developer

- Developing integrations with Microsoft Dynamics CRM 365
 - Developing interfaces with internal and external systems
 - Consuming REST Web APIs
 - Developing ASP.NET MVC applications
 - Developing SSRS reports
-

May 2020 – May 2022 | Face-Int – Full Stack Developer

- Development of systems based on ASP.NET Core Web API
 - Implementing Authentication mechanisms (JWT), OAuth, and SSO
 - Developing security middleware components
 - Frontend development using Angular
 - Using SignalR for real-time updates
-

2012 – 2018 | Lev Academic Center – Lecturer / Teaching Assistant

Courses:

- Computerized Systems Analysis (2nd Year)
 - Internet Software Engineering (4th Year)
 - Mentoring and teaching students in systems analysis and technical specification writing
 - Teaching practical software development using .NET /Node.js
 - Guiding and supervising final projects
-

2011 – 2020 | Israel Courts Administration – Senior Full Stack Developer | Team Lead

- Professional leadership (Team Lead) of enterprise-wide critical information systems serving thousands of users, including large-scale cross-organizational systems and integration projects between core enterprise systems
 - Writing technical specifications according to business requirements throughout development processes
 - Ongoing collaboration with system analysts, infrastructure teams, and information security teams
 - Hands-on development of systems based on ASP.NET Web API and ASP.NET MVC
 - Implementing Authentication, Authorization, and Identity Management solutions
 - Integration with core systems (Net HaMishpat, Dynamics CRM)
 - Leading the BI domain and developing SSRS, SSIS, and ETL solutions for enterprise reporting systems
 - Working closely with vendors and business stakeholders and supervising external development teams
 - Continued in-house development and maintenance
 - Troubleshooting complex issues, root cause analysis, and performance optimization of existing systems
 - Working in Agile / Scrum methodologies
-

2010 | Government Forms Service – Integration Specialist

- Development of Web systems using .NET
 - Implementing smart-card authentication mechanisms
 - Working with IBM DataPower
 - Working with WCF services
 - Leading complex tasks and mentoring developers (Matrix Global development team)
-

2006 – 2009 | Software Developer (Rashim, Green Point)

- Development of Web systems using ASP.NET WebForms and Classic ASP
 - Development using VB.NET and VBScript
 - Working with SQL Server and Stored Procedures
 - Developing integrations with Salesforce CRM
-

Technologies

Backend

- C#, .NET Framework, .NET Core 6+, ASP.NET Web API, ASP.NET MVC, WebForms

Frontend

- Angular (2–21), TypeScript, JavaScript, HTML5, CSS3
- Tailwind, Angular Material, PrimeNG

Security

- JWT, OAuth, SSO, ASP.NET Identity

Databases

- SQL Server (T-SQL), MySQL

Architecture & Messaging

- Microservices, Azure Service Bus, RabbitMQ

Tools & Platforms

- Azure, Git, IIS, Visual Studio, Azure DevOps, CI/CD Pipelines

BI

- SSRS, SSIS

Education

B.Sc. in Computer Science – Lev Academic Center

Languages

Hebrew and English – Native proficiency
